

Chinese Clinical Trial Registry

Statement of upload the statistical results for public access

According to the transparency policy, the statistical results of clinical trials should be uploaded and deposited in the Results Database for public sharing after one year of the trial completed.

The time-point of disclosure is decided by the researchers by choose the key of “Open” or “Not open” in the registration form.

The way of upload the data:

At the time of the trial completed, the statistical results should be fulfil in the “Statistical Results” box;

By the way, the results can be upload via a special key under the box. Any format of the file, for example, WORD, EXCEL, PDF, etc., is available.

The way for the public access:

The search window <http://www.chictr.org.cn/searchproj.aspx> provides the way to find an interested trial, then, open it and find out the “Statistical Results” and click on “download”, you can get the results if it was opened by the researcher.
